What is Invisalign?

- Invisalign® is the invisible way to straighten your teeth without braces.
- Invisalign® uses a series of clear, removable aligners to straighten your teeth without metal wires or brackets.
- Invisalign® has been proven effective in clinical research and in orthodontic practices nationwide.

How Does Invisalign Work?

- You wear each set of aligners for about 2 weeks, removing them only to eat, drink, brush, and floss.
- As you replace each aligner with the next in the series, your teeth will move little by little, week by week - until they have straightened to their final position.
- You'll visit us about once every 6 weeks to ensure that your treatment is progressing as planned.
- Total treatment time averages 9 - 15 months and the average number of aligners during treatment is between (18 - 30), but both will vary from case to case.

This year's 6th Annual Free Adult Dental Day will take place on **May 17, 2014**. We will be seeing the first 100 patients between the hours of 9am - 3pm. We will be offering services of either a cleaning, extraction or filling. We are very excited to be able to provide our services free of charge to the community. Please be sure when arriving at the event to get a ticket and fill out your paperwork, you must stay on the premises until your ticket is called. This is based on a first come first service basis, no appointments are needed. You cannot request a specific Doctor or Hygienist. If you are interested in donating or volunteering for the event, please email us at main@wcdentalarts.com or call Leann at 610-696-3371.
